Kenobi Portfolio of Investment Opportunities

GOEIG has been invited to review investment opportunities with Kenobi portfolio with over 20 years of research in new thinking in physics. The Premise of physics is that most everything that humans do today is dissonant to how nature functions. The team behind Kenobi has been integrating a body of science that is based on being in resonance with how nature functions to solve most every problem facing humanity today. Kenobi has the opportunity to be the most important and evolutionary company that has existed

GOEIG has identified Centuri patented product as a revolutionary composite material that has been used to develop a significant breakthrough in green energy technology that has successfully developed new types of shipping containers and tiny homes and more from the composite.

INCOME/LOSS	2024	2025	2026	TOTAL
Centuri	4,576,351	213,912,008	516,840,779	698,629,138

HISTORY

2003 Non profit to begin sharing the science created. Now, the largest science entity on social media, on Planet Earth. www.resonancescience.org

2005 First funding into the development of technologies based on the science.

2005 - 2011 Mark Hinds, founder and CEO of Kenobi invests approximately \$7.5MM to get projects out of concept stage.

2011 - 2023 Approximately \$125MM invested to get the projects to where they are at today. 16 operating companies created.

OPERATING COMPANIES

Developed over 20 years, the Kenobi portfolio consists of 16 operating companies that have the opportunity to impact every market that is important to humanity today. This represents a revolution of resonance working in harmony with how nature functions.

AG + MATERIAL SCIENCE

Upterra: Frequency-Based Plant Growth & Pest Mitigation

Solai: AI Powered, Modular Greenhouses

Field Futures: Tech For Metals And Rare Earth Minerals

Axia: 5G Replacement, Scalable To 9G+

Centuri: Revolutionary Composite Material

HEALTH + MEDICAL

Sourcewave: Frequency Imprinted Skin Patches For Drug-Free Therapies

Manna: Supplements To Revitalize Human Health

Jyzen: Facility Where Integrative Wellness, Resonance Science And Technology Comes Together

Sonaphi: Non-Invasive Health Diagnostics And Neuro-Feedback

Cell Code: Innovative Stem Cell Technology To Unlock And Guide Vsel's

Immunacor: Immunotherapy And Oncolytic Therapies

Form Audio: Resonant Audio Hardware

ENERGY + WATER

AEC: Perpetual "Energy Cell" That Will Replace All Batteries

Bohr: R&D For The Development Of New Technologies

Aeon: Plasma Activated Water

Centuri: Revolutionary Mag-Lev Wind Turbines

Nanoresonance: Desalinization, Water Turbines, Water Treatment

What it does: Centuri has created a revolutionary composite material that multiple verticals have been developed from:

- Composite is mostly plant based
- 10x the strength of steel at 6% of the weight
- Fire proof up to 3200 f+
- Manufactured at ambient pressure and temperature

Status:

- Ocean going vessels have been built
- Shipping containers have been built
- Revolutionary 1.1 mW wind turbine has been developed
- Construction materials with JV in Australia being manufactured now
- Tiny home has been built

Financial:

- Projections: Net Income Potential

2024	2025	2026	2027
\$4.5 Million	\$214 Million	\$517 Million	\$993 Million
